## US ARMY CENTER FOR ENVIRONMENTAL HEALTH RESEARCH Publications Supporting USACEHR Research Programs 2000-2004

- Barron, M.G., M. Anderson, D. Beltman, T. Podrabsky, W. Walsh, D. Cacela, J. Lipton, S.T. Teh, S.J. Hinton, J.T. Zelikoff, A.L. Dikkeboom, B.A. Lasee, S.K. Woolley, D.E. Tillitt, M. Holey, P. Bouchard, and N. Denslow. Association between PCBs, liver lesions, and biomarker responses in adult walleye (*Stizostedium vitreum vitreum*) collected from Green Bay, Wisconsin. J Great Lakes Res 3:156-170, 2000.
- Brennan, L., E. Boncavage-Hennessey, M. Wolfe, M. Toussaint, W. Dennis, A. Rosencrance, and H. Gardner, Jr. An *in vivo* method for using 5-Bromo-2 –deoxyuridine (BrdU) as a marker of chemically-induced hepatocellular proliferation in the Japanese medaka *(Oryzias latipes)*. Toxicol Pathol, 2000. ADA395313.
- Brennan, L.M., M.W. Toussaint, D.M. Kumsher, W.E. Dennis, A.B. Rosencrance, C. Brown, W.H. van der Schalie, and H.S. Gardner. Developmental Toxicity of Drinking Water Disinfection By-Products to Embryos of the African Clawed Frog (*Xenopus* laevis). Submitted to <u>Bull Environ Contam Toxicol</u>, 2004.
- Brennan, L.M., E.M. Boncavage-Hennessey, M.J. Wolfe, M.W. Toussaint, W.E. Dennis, A.B. Rosencrance, and H.S. Gardner. An in vivo method for using 5-bromo-2'-deoxyuridine (BrdU) as a marker of chemically-induced hepatocellular proliferation in the Japanese medaka (Oryzias latipes). <u>Toxicol Pathol</u> 29(3):387-397, 2001. ADA395313.
- Bromenshenk, J.J. and G.C. Smith. New and improved methods for monitoring air quality and the terrestrial environment. USAMRMC Final Technical Report DAMD17-95-C-5072, Fort Detrick, MD, May 2001. ADA414740.
- Buller, M., B. Nelson, R. Siegel, and G. Vaillette. Analysis and interpretation of real-time multi parameter biological data. USAMRMC Technical Report DAMD17-01-C-0009, Fort Detrick, MD, September 2001. ADB273091.
- Burton, D.T., S.D. Turley, T.R. Shedd, and E.P. Burrows. Toxicity of disopropyl methylphosphonate (DIMP) to aquatic organisms. <u>Bull Environ Contam Toxicol</u> 68(2):282-289, 2002. ADA414179.
- Burton, D.T., J.L. DiLorenzo, T.R. Shedd, and J.G. Wrobel. Aquatic hazard assessment of a contaminated surficial aquifier discharge into the Bush Riber, Maryland (USA). <u>J Water Air Soil</u> Pollut 139:159-182, 2002. ADA414770.
- Burton, D.T. and D.J. Fisher. Acute water quality criteria for chlorite in freshwater ecosystems. In: <u>Chloride Dioxide: The State of Science, Regulatory, Environmental Issues, and Case Histories</u>. Proceedings of the Fourth International Symposium on Chlorine Dioxide, February 15-16, 2001, Las Vegas, NV, AWWA Research Foundation and American Water Works Association, pp. 4.1.1-4.1.10, 2001. ADA403858.

- Burton, D.T. Evaluation of biomonitoring systems for assessment of contaminated waters and sediments at U.S. Army installations. USAMRMC Technical Report DAMD17-92-C-2066, Fort Detrick, MD, 2000. ADA378865.
- Burton, D.T., S.J. Turley, and D.J. Fisher. Bioaccumulation of total and monomethylmercury in earthworms and the ecological risk to birds and mammals at the Northeast Test Hut Graces Quarters, Aberdeen Proving Ground, Maryland. Report No. WREC-00-03, University of Maryland Wye Research and Education Center, Queenstown, MD, 2000.
- Carlson, E.A., Y. Li, and J.T. Zelikoff. Benzo[a]pyrene-induced immunotoxicity in Japanese medaka (*Oryzias latipes*): relationship between lymphoid CYP1A activity and humoral immune suppression. <u>Toxicol Appl Pharmacol</u>, (In Press).
- Carlson, E., Y. Li, and J.T. Zelikoff. Suppressive effects of Ben[a]pyrene upon fish immune function: Evolutionarily conserved cellular mechanisms of immunotoxicity. Submitted to <u>Mar</u> Environ Res, 2004.
- Carlson, E., Y. Li, and J.T. Zelikoff. Exposure of Japanese medaka (*Oryzias latipes*) to benzo(a)pyrene suppresses immune function and host resistance against bacterial challenge. <u>Aquat Toxicol</u> 56:289-301, 2002.
- Carlson, E., Y. Li, and J.T. Zelikoff. The Japanese medaka (*Oryzias latipes*) model: applicability for investigating the immunosuppressive effects of the aquatic pollutant benzo(a)pyrene. <u>Mar Environ Res</u> 54:565-568, 2002. ADA408201.
- Carlson, E. A. Benzo(a)pyrene-induced immune alteration in the Japanese Medaka *Oryzias latipes*: Probing the underlying cellular mechanisms. Thesis dissertation, 2002, ADA414461.
- Carlson, E.A., Y. Li, and J.T. Zelikoff. Exposure of Japanese medaka (*Oryzias latipes*) to benzo[a]pyrene (BaP). Mar Environ Res, (In Press).
- Carlson, E.A., Y. Li, and J.T. Zelikoff. Exposure of Japanese medaka (*Oryzias latipes*) to benzo[a]pyrene suppresses immune function and host resistance against bacterial challenge. Aquat Toxicol 56:289-301, 2002. ADA403859.
- Carlson, E.A., Y. Li, and J.T. Zelikoff. Immunotoxicity biomarkers in fish: Development, validation and application for field studies and risk assessment. <u>Hum Ecol Risk Asses</u> 8:253-263, 2002. ADA403872.
- Clegg, E.D., S.D. Perreault, and G.R. Klinefelter. Assessment of male reproductive toxicity. In: <u>Principles and Methods of Toxicology</u>, 4th Edition, Chapter 28, A.W. Hayes (Ed.). Taylor and Francis, Philadelphia, PA, pp. 1263-1300, 2001. ADA402466.
- DiNovo, G. New biosensors for real-time aquatic toxicity monitoring. USAMRMC Technical Report DAMD17-02-C-0011, Fort Detrick, MD, October 2002. ADB285013.

- Duffy, J.E., Y. Li, and J.T. Zelikoff. Effects of a coplanar PCB on the innate immune response of fish are time-dependent. Submitted to <u>Bull Environ Toxicol Chem</u>, 2004.
- Duffy, J.E., E. Carlson, Y. Li, C. Prophete, and J.T. Zelikoff. Impact of polychlorinated biphenyls (PCBs) on the immune function of fish: Age as a variable in determining adverse outcome. Mar Environ Res 54:559-563, 2002. ADA408196.
- Fort, D.J. and J.A. Bantle. Development of a Reproductive Toxicity Test Using *Xenopus*. USAMRMC Technical Report DAMD17-97-2-7017, Fort Detrick, MD, May 2000. ADA379162.
- Gerdes, J.C. Rapid in field detection of microbial pathogens in water. USAMRMC Technical Report DAMD17-00-C-0001, Fort Detrick, MD, June 2001. ADB267797.
- Goodfellow, W.L. L.W. Ausley, D.T. Burton, D.L. Denton, P.B. Dorn, D.r. Grothe, M.A. Heber, T.J. Norberg-King, and J.H. Rodgers, Jr. Major ion toxicity in effluents: A review with permitting recommendations. <u>Environ Toxicol Chem</u> 19:175-182, 2000.
- Kane, A. Real-time behavioral monitoring for toxicity caused by harmful algal blooms and other water quality perturbations. USAMRMC Technical Report DAMD17-00-2-0014, Ft. Detrick, MD, August 2001. ADA404781.
- Knechtges, P.L., T.P. Gargan II, and W.D. Burrows. Science and technology objective (STO) to develop tests for detecting microbial and chemical contaminants in food and water. In: <a href="Chemical and Biological Early Warning Monitoring for Water, Food, and Ground">Chemical and Biological Early Warning Monitoring for Water, Food, and Ground</a>, Proceedings of the International Society for Optical Engineering, Vol. 4575, J.L. Jensen and L.W. Burggraf (Eds.), Bellingham, Massachusetts, pp. 1-11, 2002. ADA402292.
